Goals	Problem list	Equipment	Equipment features	Equipment benefits	Considerations
What are your client's goals? Are the goals SMART? - Specific. - Measurable. - Achievable. - Realistic. Time-bound	Insert your clients' problems here. 1. 2. 3. If necessary, add more rows.	Insert your equipment recommendations here.	These are specific features the equipment has, which could include: - Wheelchair weight. - Foam or air mattress. - Standard vs deep contour back support.	This is about how the equipment features benefit the client's injury-related needs. This could include: - The 4kg transport weight of the x manual wheelchair makes it easier for Mr X to lift the wheelchair into his car. - The air mattress gives Mrs X optimal pressure relief while she recovers from her pressure injury. - The deep contour back support gives Mr X optimal lateral support, making him comfortable and functional in his wheelchair.	This could be things to consider like: - Safety. - Training. - Education. - Repairs. - Broader needs, i.e., new referral or communication with the Case Manager.
	Insert as many rows as you need	Insert the equipment you discounted here.	Insert equipment features that don't meet your clients' needs.	Insert here why the equipment features don't meet your client's injury-related needs.
